

October 2021

COVID-19 Vaccine Update

Clark Nursing and Rehab residents to date are 99% fully vaccinated against COVID-19. Residents here at the facility have been offered the Pfizer booster vaccinations and many have received them. We were pleased and proud to announce that 100% of all the employees are fully vaccinated against COVID-19. Should you have a question regarding the vaccination process, please speak with your nurse or Social Worker.

Resident/Staff COVID-19 Testing

We are currently COVID free and are not doing weekly testing of our residents. Testing continues for new admissions who have not been vaccinated. Should a resident/patient or staff member test positive the center will once again begin weekly testing. We will keep you updated either by phone, on our Facebook page, and on this website.

Our Commitment

Resident and Staff wellness and safety is our top priority. We continue to follow all Infection Prevention and Control guidelines and recommendations by the NJ DOH and Local Board of Health to maintain our current state of wellness. We are truly dedicated to the health and well-being of our residents and staff.

Thank you for your patience and cooperation during this difficult time. If you have any questions or concerns please do not hesitate to contact us.
