

## **COVID-19 Information**

**March 2021**

### **COVID-19 Vaccination Update**

Clark Nursing and Rehab has completed all three vaccine clinics partnered with CVS. We were pleased with the response and the number of staff and residents who received the vaccine. Clark would like to thank CVS for setting up the clinics, the CVS staff was courteous and professional to all residents and staff. IF you have questions please feel free to reach out to your Social Worker.

### **Resident Update**

All Residents are doing well and remain COVID free. Weekly Resident COVID Testing has been suspended at this time; however, should we have a positive test result we will again test all residents. Residents are retested each time an employee tests positive for COVID-19. If we have to test the residents you will be notified by telephone, on our Facebook page, and on this website.

### **Staff Update**

Currently all of our staff is once again COVID free and we will continue with testing.

### **Resident/Staff COVID-19 Testing**

Clark is following the NJ Department of Health (NJ DOH) and current Center for Disease Control (CDC) guidelines and are conducting weekly testing for residents when there is a positive test in the center. Staff is being tested twice per week.

## **Visitation**

Outdoor Visitations will resume again on Monday, March 1, 2021, weather permitting. Social Services will be making phone calls to set up appointments.

## **Phased Reopening**

Recently, The NJ DOH issued Executive Directive No. 20-026 establishing mandatory procedures that long term care facilities must meet in order to safely reopen to all visitors and resume normal operations. The phased reopening is based on the outbreak status of a facility and community, its ability to meet criteria, including, but not limited to testing of Staff and Residents, infection control standards, and adequate Staffing and Personnel Protective Equipment (PPE) following the State's reopening plan. When facilities are outbreak free, they may restore services for Residents, in phases, starting with indoor visitation and the restart of normal activities.

## **Our Commitment**

Resident and Staff wellness and safety is our top priority. We continue to follow all Infection Prevention and Control guidelines and recommendations by the NJ DOH and Local Board of Health to maintain our current state of wellness. We are truly dedicated to the health and well-being of our residents and staff.

*Thank you for your patience and cooperation during this difficult time. If you have any questions or concerns please do not hesitate to contact us.*
