

COVID-19 Information

MAY 2021

COVID-19 Vaccination Update

Clark Nursing and Rehab has completed all three vaccine clinics partnered with CVS. We were pleased with the response and the number of staff and residents who received the vaccine. We signed an agreement with our pharmacy to receive the vaccine. WE will keep everyone updated on its availability. The vaccine will be available to residents and staff. Should you have a question regarding the vaccination process, please speak with your nurse or Social Worker.

Resident Update

We currently have 3 short term stay patients that have tested positive. Weekly Resident COVID Testing began and will continue for the twice a week for 2 weeks. Currently all other residents remain negative. We will keep you updated either by phone, on our Facebook page, and on this website.

Staff Update

Currently we have one employee test positive for COVID. The employee is out of work for 14 days.

Resident/Staff COVID-19 Testing

Clark is following the NJ Department of Health (NJ DOH) and current Center for Disease Control (CDC) guidelines and are conducting weekly testing for residents when there is a positive test in the center. Staff is being tested twice perweek.

Visitation

Due to positive COVID cases in the center Indoor visitations are suspended. Outdoor visits will continue. Social Services will be making phone calls to set up appointments or you may call to schedule a visit. Visits are available on Mondays, Wednesdays, Friday's and Saturdays between 10:00 am and 6:00 pm. We will do our best to accommodate special requests. You will be notified as to the changes in visitations.

Phased Reopening

Recently, The NJ DOH issued Executive Directive No. 20-026 establishing mandatory procedures that long term care facilities must meet in order to safely reopen to all visitors and resume normal operations. The phased reopening is based on the outbreak status of a facility and community, its ability to meet criteria, including, but not limited to testing of Staff and Residents, infection control standards, and adequate Staffing and Personnel Protective Equipment (PPE) following the State's reopening plan. When facilities are outbreak free, they may restore services for Residents, in phases, starting with indoor visitation and the restart of normal activities.

Our Commitment

Resident and Staff wellness and safety is our top priority. We continue to follow all Infection Prevention and Control guidelines and recommendations by the NJ DOH and Local Board of Health to maintain our current state of wellness. We are truly dedicated to the health and well-being of our residents and staff.

Thank you for your patience and cooperation during this difficult time. If you have any questions or concerns please do not hesitate to contact us.
